

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, June 23, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (149 fires)
New large incidents:	7
Large fires contained:	2
Uncontained large fires: **	18
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 44 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	4
New large incidents:	0
Uncontained large fires:	9
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Contreras, Papago Agency, BIA. IMT 2 (EA Gold Team). Fifteen miles northeast of Topawa, AZ. Brush and short grass. Moderate fire behavior with backing, creeping and smoldering. Numerous structures, energy and communication infrastructure threatened. Evacuations, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Pipeline, Coconino NF, USFS. IMT 1 (GB Team 2). IMT is also managing the Haywire fire. Five miles north of Flagstaff, AZ. Timber, brush and grass. Minimal fire behavior with creeping, backing and flanking. Energy infrastructure and residences threatened. Evacuations, area, road and trail closures in effect.

Haywire, Coconino NF, USFS. Seventeen miles northeast of Flagstaff, AZ. Timber, brush and short grass. Minimal fire behavior with creeping, backing and flanking. Residences threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Hermits Peak, Santa Fe NF, USFS. NIMO (Team 2) and IMT 2 (SW Team 5). Transfer of command from IMT 1 (SW Team 1) to IMT 2 (SW Team 3) will occur today. Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Minimal fire behavior with creeping and smoldering. Numerous residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Black, Gila NF, USFS. IMT 2 (SW Team 4). Twenty-four miles north of Mimbres, NM. Grass and timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Raspberry, Coronado NF, USFS. Eleven miles northeast of Portal, AZ. Timber, brush and short grass. Minimal fire behavior with smoldering. Structures and communication infrastructure threatened.

Midnight, Carson NF, USFS. Eight miles northwest of El Rito, NM. Timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

Fish, Apache-Sitgreaves NF, USFS. Twenty miles southwest of Alpine, AZ. Timber and medium slash. Minimal fire behavior with creeping and smoldering. Road closures in effect. Precipitation occurred over the fire area yesterday.

Hog Spring, Apache-Sitgreaves NF, USFS. Ten miles east of Show Low, AZ. Timber and short grass. Minimal fire behavior with creeping and smoldering.

Alaska Area (PL 4)

New fires: 17
New large incidents: 2
Uncontained large fires: 1
Type 2 IMTs committed: 1

Lime Complex (12 fires), Southwest Area Forestry, Alaska DOF. IMT 2 (AK Black Team). Fifty miles east of Chuathbaluk, AK. Grass, timber and brush. Active fire behavior with wind-driven runs, flanking and torching. Numerous structures, communication and energy infrastructure threatened.

* **Clear**, Fairbanks Area, Alaska DNR. Ten miles northwest of Anderson, AK. Brush and hardwood slash. Active fire behavior. Residences threatened. Last narrative report unless significant activity occurs.

Sithylemenkat, Tanana Zone, BLM. Forty-six miles southeast of Allakaket, AK. Timber and short grass. No new information.

* **Central Creek Airstrip**, Delta Area Forestry, Alaska DOF. Thirty-one miles northeast of Delta Junction, AK. Timber. Minimal fire behavior with smoldering and creeping. Last narrative report unless significant activity occurs.

Apoon Pass, Galena Zone, BLM. Previously reported incident. Twenty-four miles north of Mountain Village, AK. Timber, brush and short grass. Moderate fire behavior with backing, flanking and creeping. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper low will move into the Great Basin today with isolated to scattered mixed wet and dry thunderstorms across portions of the eastern Sierra, central and southern Nevada, and southwest Utah. The greatest threat for new significant fires will be over central and southeastern Nevada into southwest Utah. Thunderstorms will be wet across much of Arizona into New Mexico, southeast Utah, and southern Colorado, with heavy rain and flooding possible. Hot and dry conditions with near record setting temperatures are likely across portions of Alabama and Georgia, but winds will be light. Hot temperatures are likely across the lower elevations of California as well. Scattered showers and thunderstorms are expected across the northern Rockies this afternoon, with more numerous thunderstorms, a few severe, across the northern and central Plains. Above normal temperatures with isolated afternoon thunderstorms will continue across south-central Alaska today, with a few thunderstorms into the eastern Interior as well. Locally breezy and dry conditions are expected across the central and northern Interior this afternoon with rapid spread possible on existing fires.

Safety Zones 2 (LCES)

Operational Engagement Category

Safety Zones are locations where a threatened firefighter can find adequate refuge from an approaching fire. Unfortunately, some shelter deployment sites have been incorrectly called safety zones. Safety zones are locations where no fire shelter is needed.

This isn't meant to deter a firefighter from deploying their shelter if needed but to clarify that the location is not a true safety zone if a shelter deployment is necessary.

Fireline intensity and topographic location determine a safety zone's effectiveness.

- How have you distinguished between a safety zone and a deployment zone?
- Is refuge in a vehicle or house an acceptable tactic?

Consider access to the incident. You are often confronted with considerable distances of unburned fuel to cross. How do you manage Lookouts, Communications, Escape Routes, and Safety Zones (LCES)?
