# National Interagency Coordination Center Incident Management Situation Report <br> Friday, July 1, 2022 - 0730 MDT <br> National Preparedness Level 2 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: **
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
***Complex IMTs committed:

Light (181 fires)
7
3
13
0
0
1
7
0
***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 61 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

## Alaska Area (PL 5)

| New fires: | 13 |
| :--- | :---: |
| New large incidents: | 5 |
| Uncontained large fires: | 0 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 4 |

Lime Complex (14 fires), Southwest Area, Alaska DOF. IMT 2 (AK Green Team). Fifty miles east of Chuathbaluk, AK. Grass, timber and brush. Active fire behavior with flanking, running and torching. Numerous structures, communication and energy infrastructure threatened.

Clear, Fairbanks Area, Alaska DOF. IMT 2 (NW Team 10). Ten miles northwest of Anderson, AK. Timber and short grass. Active fire behavior with creeping, group torching and smoldering. Numerous residences threatened. Evacuations and area closures in effect.

Bean Complex (5 fires), Tanana Zone, BLM. IMT 2 (NW Team 7). Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Active fire behavior with short crown runs, torching and spotting. Structures threatened.

Minto Lakes, Fairbanks Area, Alaska DOF. Previously reported incident. IMT 2 (NR Team 3). IMT 1 (CA Team 1) mobilizing. Nineteen miles north of Whittier, AK. Timber and hardwood litter. Active fire behavior with group torching, backing and flanking. Residences threatened.

Hog Butte, Tanana Zone, BLM. Previously reported incident. Twenty-one miles northwest of Telida, AK. Timber and grass. Active fire behavior with backing. Last narrative report unless significant activity occurs.

Lansing Creek, Upper Yukon Zone, BLM. Previously reported incident. Started on FWS land 30 miles southeast of Coldfoot, AK. Short grass. Active fire behavior with running, torching and crowning. Last narrative report unless significant activity occurs.

North Fork, Upper Yukon Zone, BLM. Previously reported incident. Eighteen miles southwest of Chandalar, AK. Timber and short grass. Active fire behavior. Last narrative report unless significant activity occurs.

* Radio Creek, Galena Zone, BLM. Forty miles north of Ruby, AK. Timber, short grass and brush. Active fire behavior with group torching, flanking and backing. Last narrative report unless significant activity occurs.

Schilling Creek, Upper Yukon Zone, BLM. Previously reported incident. Four miles southeast of Caro, AK. Timber and short grass. Active fire behavior with running and spotting. Structures threatened. Last narrative report unless significant activity occurs.

Paddle, Upper Yukon Zone, BLM. Previously reported incident. Thirty-six miles northeast of Circle, AK. Timber and short grass. Active fire behavior. Last narrative report unless significant activity occurs.

Curky, Tanana Zone, BLM. Previously reported incident. Forty-five miles northwest of Stevens Village, AK. Timber and short grass. Active fire behavior with backing, running and smoldering. Last narrative report unless significant activity occurs.

* Snohomish, Tanana Zone, BLM. Started on state land 15 miles southwest of Lake Minchumina, AK. Timber and tall grass. Active fire behavior with backing. Community of Lake Minchumina and structures threatened. Last narrative report unless significant activity occurs.

Douglas, Upper Yukon Zone, BLM. Previously reported incident. Twenty-seven miles southeast of Evansville, AK. Timber and short grass. Moderate fire behavior with backing, running and smoldering. Structures and energy infrastructure threatened. Last narrative report unless significant activity occurs.

Melozitna, Galena Zone, BLM. Previously reported incident. Twenty-three miles northeast of Ruby, AK. Brush, timber and tall grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

Boatman, Upper Yukon Zone, BLM. Previously reported incident. Twenty-three miles southeast of Coldfoot, AK. Short grass. Active fire behavior with smoldering and creeping. Last narrative report unless significant activity occurs.

Huron, Tanana Zone, BLM. Previously reported incident. Twenty miles northeast of Rampart, AK. Timber. Active fire behavior. Last narrative report unless significant activity occurs.

Hilltop, Tanana Zone, BLM. Previously reported incident. Sixty-five miles southwest of Tanana, AK. Timber. Active fire behavior. Last narrative report unless significant activity occurs.

* Eddy Creek, Galena Zone, BLM. Thirty-one miles southwest of Galena, AK. Short grass and chaparral. Minimal fire behavior. Last narrative report unless significant activity occurs.
* Middle Fork, Fairbanks Area, Alaska DOF. Forty-five miles east of Fairbanks, AK. Timber. Active fire behavior with single tree torching and flanking. Structures threatened. Last narrative report unless significant activity occurs.
* Tagagawik 2, Galena Zone, BLM. Sixty-eight miles northeast of Koyuk, AK. Brush and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Hot and dry conditions are expected across much of the Interior, western, and south-central Alaska, with gusty winds over western Alaska into south-central Alaska and the western Interior. High-Risk significant fire potential and Fire Weather Watches have been issued for thunderstorms across much of the Interior, with thunderstorms likely extending into portions of the Brooks Range, south-central and southeast Alaska. Far western Alaska will have higher humidity and showers. Dry and breezy conditions will continue along and east of the Sierra and Peninsular Ranges and likely farther east across portions of the Great Basin. Monsoonal thunderstorms will continue across much of the Southwest, greater Four Corners region, southeast Idaho, Wyoming, and onto the central and northern Plains. Isolated thunderstorms may develop from far northern California and south-central Oregon into central Idaho and western Montana late afternoon into tonight. Thunderstorms will continue near the Gulf and southeast Atlantic Coasts extending inland across Texas and the Southeast, with thunderstorms likely across much of the Mid-Atlantic, eastern Great Lakes, and Northeast.

## Perspective from the Florida Forest Service

## Today's topic is dedicated to all of Florida's fallen firefighters.

Between June 1 and 16, 2011, northern Florida and southern Georgia experienced widespread drought conditions contributing to 659 fires in Florida alone. Live fuel moistures were critically low on the Blue Ribbon Fire located on a slash pine plantation. Several fires ignited by lightning from a passing front on June 16 in the same area. Dry swamps and heavy fuels made accessing and controlling fires difficult. Contained the first day, the Blue Ribbon Fire would jump containment lines four days later. The Incident Commander (IC) arrived June 20.

- 1510 - The fire was 5 to 8 acres and moving fast.
- 1555 - A Type 3 open cab tractor/plow unit calls in that he is "stumped" and a Type 2 closed cab tractor-plow (T/P) unit replies, "I'm going to push you."
- 1600 - Another unit on the fire noted that the smoke column changed direction.
- 1620 - The IC noted that he had not heard from the two T/P units and was unable to make contact. The units were found, and they had been burned over. It appeared that the second T/P unit, in an attempt to push the stumped unit off, had become blocked between numerous large stumps. The firefighter/operators had left their immobilized units and were overtaken by fire. Neither had deployed a fire shelter. Evidence indicated that neither tractor was suitable for sheltering. The two firefighter/operators did not survive.

The loss of Joshua Burch and Brett Fulton significantly impacted their local unit and the Suwanee Forestry Center, as well as the Florida Forest Service (FFS) at all levels. "We're going to do everything we can to train and communicate and to develop a fire program where, to the best of our ability, we'll never have this happen again." That is the living legacy of Josh and Brett.

To ensure that legacy, the FFS chose to develop a staff ride. This method would allow the participants to walk in the shoes of the firefighters involved in the incident and to gain key lessons that could be shared with their home units. The Blue Ribbon Staff Ride (BRSR) was developed in 2017 through the vision of Jim Karels, then State Forester and Director of the Florida Forest Service. He selected an FFS workshop team to develop the BRSR in partnership with the National Staff Ride Workshop, the NWCG Wildland Fire Leadership Development Program, https://www.nwcg.gov/wfldp/, Wildland Fire Lessons Learned Center ${ }_{2}$ https://www.wildfirelessons.net/home, and OMNA International, LLC, http://www.theomna.com/index.html. The goal was to enhance learning in key operational areas including leadership, communications, tactics, and preparedness related to firefighting. The BRSR strengthens these skills to improve the ability to fulfill the FFS mission to protect homes, forestland, and natural resources from the devastating effects of wildfire.
"The BRSR reached further than expected - it stretched participants and leaders alike beyond the intended experiential learning experience. While honoring the memory of our brothers, Joshua Burch, and Brett Fulton, the BRSR fostered an environment for people to grieve their loss, providing a space for healing and perhaps serve as a catalyst for moving forward." - Wildland Fire Leadership Blog, Blue Ribbon Staff Ride - Honoring Through Learning, https://wildlandfireleadership.blogspot.com/2019/02/blue-ribbon-staff-ride-honoring-through.html
"Based on my experience, I have found the staff ride development process to be an emotional and healing process. Valuable information can now be passed on to our current and future teammates while honoring the ultimate sacrifice of the brothers we lost in 2011." - George Risko, FFS Fire Training Officer
Incorporating staff rides into RT-130, Wildland Fire Safety Training Annual Refresher (WFSTAR) deliveries adds great value for participants. Staff rides can be built for a vast array of situations-a
"Put your people first - today, tomorrow, forever." - Jim Karels large wildfire, prescribed fire, hurricane response, etc. The workshop offers tools and confidence to develop more staff rides and share our knowledge with others. If you have a vision or an idea for a local staff ride, consider attending the National Staff Ride Workshop or hosting a session of your own. It is the most rewarding hard work you will ever put in, and you will meet some incredible folks to assist you along the way.
