# National Interagency Coordination Center Incident Management Situation Report Thursday, July 7, 2022 - 0730 MDT <br> National Preparedness Level 2 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: **
Light (150 fires)
7
2

Area Command teams committed: 0
NIMOs committed:
0
Type 1 IMTs committed: 2

Type 2 IMTs committed: 5
***Complex IMTs committed:0
***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 67 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

## Alaska Area (PL 5)

New fires: 13
New large incidents: 3
Uncontained large fires: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 4
Clear, Fairbanks Area, Alaska DOF. IMT 2 (NW Team 10). Ten miles northwest of Anderson, AK. Timber and short grass. Active fire behavior with group torching, torching and spotting. Numerous residences threatened. Evacuations in effect.

Minto Lakes, Fairbanks Area, Alaska DOF. IMT 1 (CA Team 1). Nineteen miles north of Whittier, AK. Timber and hardwood litter. Minimal fire behavior with flanking, backing and smoldering. Residences threatened. Area, road and trail closures in effect.

Lime Complex (14 fires), Southwest Area, Alaska DOF. IMT 2 (AK Green Team). Fifty miles east of Chuathbaluk, AK. Grass, timber and brush. Minimal fire behavior. Numerous structures, communication and energy infrastructure threatened. Precipitation occurred over the fire area yesterday.

Bean Complex (5 fires), Tanana Zone, BLM. IMT 2 (NW Team 7). Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Active fire behavior with running, torching and spotting. Structures threatened.

Middle Tanana Complex, Delta Area, Alaska DOF. IMT 2 (NR Team 3). Thirty-two miles northeast of Delta Junction, AK. Timber. Active fire behavior with short crown runs, uphill runs and flanking.

Dalton Highway Complex (4 fires), Tanana Zone, BLM. Twenty-five miles south of Coldfoot, AK. Timber and short grass. Moderate fire behavior with group torching, backing and creeping. Structures and energy infrastructure threatened. Last narrative report unless significant activity occurs.

Poorman Complex (3 fires), Galena Zone, BLM. Previously reported incident. Thirty-eight miles southeast of Ruby, AK. Timber litter. Moderate fire behavior with backing and creeping. Structures threatened. Precipitation occurred over the fire area yesterday. Last narrative report unless significant activity occurs.

Snohomish, Tanana Zone, BLM. Previously reported incident. Started on state land 15 miles southwest of Lake Minchumina, AK. Timber and tall grass. Moderate fire behavior with backing. Community of Lake Minchumina and structures threatened. Last narrative report unless significant activity occurs.

Hog Butte, Tanana Zone, BLM. Previously reported incident. Twenty-one miles northwest of Telida, AK. Timber and short grass. Moderate fire behavior. Structures threatened. Last narrative report unless significant activity occurs.

* Biederman, Upper Yukon Zone, BLM. Started on NPS land 52 miles southeast of Circle, AK. Timber. Active fire behavior. Structures threatened. Last narrative report unless significant activity occurs.
* Fanny Mountain, Upper Yukon Zone, BLM. Fifty-three miles east of Circle, AK. Timber. Active fire behavior with backing, running and torching. Last narrative report unless significant activity occurs.
* Salmon, Upper Yukon Zone, BLM. Sixty-five miles east of Chalkyitsik, AK. Timber. Moderate fire behavior. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Isolated to scattered thunderstorms are forecast for central and eastern portions of the Interior and Brooks Range, with areas near the Canadian border favored. Showers, cooler temperatures, and higher humidity will spread from southwest Alaska into southcentral Alaska and possibly western poritons of the Interior, but gusty southerly winds are possible in western and southern portions of the Interior, especially near wind favored gaps of the Alaska Range. Dry and breezy conditions will continue across portions of the Great Basin, with hot and dry conditions in much of Texas and Oklahoma. Monsoon thunderstorms will shift east and primarily develop over New Mexico, Colorado into Wyoming, and perhaps far southeast Arizona. Thunderstorms will continue across portions of the Inland Pacific Northwest, with greater coverage and intensity across Montana onto the northern and central High Plains. Strong to severe thunderstorms are possible across the central Plains and through the Mid-Atlantic and southern and central Appalachians.

Hazard Tree Felling Safety Tips 1
Felling Safety Category

Felling a hazard tree requires accurate risk assessment and complexity analysis, and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure, i.e., collapse.
- Weakened sapwood resulting in loss of control when falling trees and limits solid wood for wedging.
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

Indicators of potential felling hazards:
Dead Limbs: limbs of all sizes and species with decay evident cracking, or loose, hung-up limbs. Avoid working under overhead hazards.

Witches Broom: caused by mistletoe infection, limbs can grow very large and heavy (200+lbs).
Split Trunk: cracked trunk from frost, lightning, or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail.

Stem Damage: caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.
Thick Sloughing Bark or Sloughing Sapwood: usually found on dead trees. Loose bark on Douglas fir or loose sapwood on wind snapped cedars can dislodge during falling.

Butt and Stem Cankers: usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

Fungal Fruiting Bodies or Conks: found on stems it may indicate massive interior rot 1-2 yards above and below conk. Excessive resinosis (resin flow) also indicates heart or root diseases.

Heavy Tree Lean: may be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

Root Condition: look for any ground cracks around the base of the tree, signs of decay or fungal conks on the roots.

Cat Face: look for enough solid wood to construct an effective undercut and back cut.
