0
029

0
${ }^{* * *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 107 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 5 |

Clear, Fairbanks Area, Alaska DOF. IMT 1 (NR Team 1). Ten miles northwest of Anderson, AK. Timber, hardwood litter and short grass. Minimal fire behavior with creeping and smoldering. Numerous residences threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

Minto Lakes, Fairbanks Area, Alaska DOF. IMT 1 (CA Team 1). Twenty miles southeast of Minto, AK. Timber and light logging slash. Minimal fire behavior with backing, creeping and smoldering. Residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Bean Complex (4 fires), Tanana Zone, BLM. Transfer of command from IMT 2 (NW Team 7) to IMT 2 (NR Team 4) will occur tomorrow. Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday.

Middle Tanana Complex (8 fires), Delta Area, Alaska DOF. IMT 2 (NR Team 3). Thirty-two miles northeast of Delta Junction, AK. Timber and brush. Minimal fire behavior with smoldering and creeping. Residences threatened.

Dalton Highway Complex (7 fires), Tanana Zone, BLM. IMT 2 (CA Team 14). Seventy-seven miles northwest of Beaver, AK. Timber and short grass. Minimal fire behavior with creeping, group torching and backing. Energy infrastructure threatened. Reduction in acreage due to more accurate mapping.

Lime Complex (14 fires), Southwest Area, Alaska DOF. IMT 2 (NW Team 9). Fifty miles east of Chuathbaluk, AK. Short grass, timber and brush. Minimal fire behavior with smoldering and creeping. Numerous structures threatened. Precipitation occurred over the fire area yesterday.

Little Chena River, Fairbanks Area, Alaska DOF. Twenty-six miles northeast of Fairbanks, AK. Hardwood litter and timber. Minimal fire behavior with smoldering.

Christian, Upper Yukon Zone, BLM. Started on Native Corporation land 22 miles east of Venetie, AK. Timber. No new information.

Brown Grass, Upper Yukon Zone, BLM. Started on Native Corporation land 46 miles northeast of Venetie, AK. Timber. No new information.

Idaho Bar, Tanana Zone, BLM. Started on Native Corporation land five miles southeast of Rampart, AK. Hardwood litter and short grass. No new information.

* Larry, Tanana Zone, BLM. Sixty-seven miles northwest of Tanana, AK. Timber and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

Paradise Complex (6 fires), Tanana Zone, BLM. Previously reported incident. Six miles southwest of Lake Minchumina, AK. Timber and short grass. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday. Last narrative report unless significant activity occurs.

Slathtouka, Tanana Zone, BLM. Previously reported incident. Nineteen miles southwest of Allakaket, AK. Timber and short grass. Minimal fire behavior with smoldering. Residences threatened. Precipitation occurred over the fire area yesterday. Last narrative report unless significant activity occurs.

Poorman Complex (3 fires), Galena Zone, BLM. Thirty-eight miles southeast of Ruby, AK. Timber. Minimal fire behavior with creeping and backing. Structures threatened. Last narrative report unless significant activity occurs.

Howling Dog, Upper Yukon Zone, BLM. Previously reported incident. Started on FWS land 51 miles northeast of Chalkyitsik, AK. Short grass and timber. Minimal fire behavior. Last narrative report unless significant activity occurs.

## Southern Area (PL 2)

New fires: 13
New large incidents: 4
Uncontained large fires: 8

* 720, Oklahoma DOF. Nine miles north of Watonga, OK. Tall grass and timber. Extreme fire behavior with wind-driven runs, long-range spotting and group torching. Road closures in effect.
* South Bend, Texas A\&M Forest Service. Started on private land 16 miles northeast of Breckenridge, TX. Tall grass and brush. Moderate fire behavior with creeping.
* 8 Mile Mountain \#2, Oklahoma DOF. Nine miles northwest of Talihina, OK. Hardwood litter and short grass. Active fire behavior with uphill runs, flanking and running.
* Mustang, Texas A\&M Forest Service. Started on private land four miles north of Godley, TX. Tall grass and brush. Active fire behavior with running and flanking. Residences threatened. Evacuations in effect.

Nethery Road, Texas A\&M Forest Service. Started on private land 17 miles southwest of Junction, TX. Tall grass and brush. Minimal fire behavior with creeping. Structures threatened.

Tatum, Texas A\&M Forest Service. Started on private land 11 miles northwest of Cisco, TX. Tall grass and brush. Minimal fire behavior with smoldering. Structures threatened.

Hard Castle, Texas A\&M Forest Service. Started on private land six miles north of Meridian, TX. Tall grass and brush. Minimal fire behavior with smoldering. Residences threatened. Evacuations in effect.

8 Mile Mountain, Oklahoma DOF. Nine miles northwest of Talihina, OK. Hardwood litter and short grass. No new information.

Predictive Services Discussion: Dry and breezy downslope west winds of 10-20 mph with gusts 3035 mph are forecast across the eastern Cascades and northern Sierra with relative humidity of 5-15\%. Hot and dry conditions are likely over much of the Great Basin into California and eastern Oregon with highs near or above $100^{\circ} \mathrm{F}$ in the valleys and afternoon relative humidity of $5-20 \%$. Above normal temperatures will stretch into the Inland Northwest and northern Rockies as well, while poor overnight humidity recovery is likely for the Sierra and much of Nevada into southeast Oregon. Hot temperatures are forecast over much of Kansas and Oklahoma with afternoon relative humidity of 15-30\%, but winds are expected to be lighter at 10-15 mph.

Showers are likely to spread into much of south-central Alaska and the Interior, with areas of wetting rain. Overall, below normal temperatures and higher humidity will continue over the state. Monsoon thunderstorms will continue over the Greater Four Corners, although activity will be less than Thursday and Friday, with thunderstorm activity forecast to decrease across the Gulf Coast and Southeast as well. Scattered strong to severe thunderstorms are forecast across the Mid-Mississippi Valley into the Great Lakes ahead of a cold front.

## Serious Injury Procedures <br> Firefighter Health \& First Aid

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to ensure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your Crew Boss, Division Supervisor, Incident Commander, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide accurate, concise information on the following:
- Number of people injured.
- Type of injuries.
- Severity of injuries (light, moderate, severe, life threatening).
- Mechanism of injury.
- Vital signs (pulse, respiration, level of consciousness, etc.).
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic. Provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, ensure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
