

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, July 21, 2022 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (133 fires)
New large incidents:	8
Large fires contained:	0
Uncontained large fires: **	29
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 99 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 3)

New fires: 1
 New large incidents: 1
 Uncontained large fires: 1
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 3

Clear, Fairbanks Area, Alaska DOF. IMT 1 (NR Team 1). Ten miles northwest of Anderson, AK. Timber, hardwood litter and closed timber litter. Minimal fire behavior with creeping and smoldering. Numerous residences threatened.

Bean Complex (4 fires), Tanana Zone, BLM. IMT 2 (NR Team 4). Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday.

Dalton Highway Complex (7 fires), Tanana Zone, BLM. IMT 2 (CA Team 14). Seventy-seven miles northwest of Beaver, AK. Timber and short grass. Minimal fire behavior with creeping and backing. Energy infrastructure threatened.

Lime Complex (14 fires), Southwest Area, Alaska DOF. Transfer of command from IMT 2 (NW Team 9) back to the local unit will occur tomorrow. Fifty miles east of Chuathbaluk, AK. Short grass, timber and brush. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

* **Billy Creek**, Tok Area, Alaska DOF. Seventeen miles northeast of Dry Creek, AK. Closed timber litter. Active fire behavior with single tree torching and short-range spotting. Structures threatened.

Minto Lakes, Fairbanks Area, Alaska DOF. Transfer of command from IMT 1 (CA Team 1) back to the local unit occurred yesterday. Twenty miles southeast of Minto, AK. Timber and light logging slash. Last narrative report unless significant activity occurs.

Middle Tanana Complex (8 fires), Delta Area, Alaska DOF. Thirty-two miles northeast of Delta Junction, AK. Timber and brush. Minimal fire behavior with smoldering. Residences threatened. Last narrative report unless significant activity occurs.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: A ridge of high-pressure situated over the western United States continues to bring above normal temperatures and low relative humidity to much of the region. Temperatures will reach the high 90s across the lower elevations today and above 110°F in areas near the Mojave Desert. Texas and the southern Plains will get a slight relief with highs a few degrees cooler than recently, and scattered thunderstorms are expected in that area, possibly on the dry side in northwest Texas. Breezy conditions and isolated thunderstorms ahead of an incoming trough are possible across the inland Pacific Northwest, and into western Montana and Wyoming.

Monsoonal moisture will continue to circulate in the Southwest, producing isolated thunderstorms and localized heavy rain in the higher terrain, but due to the strength of the ridge, will be mostly limited to Arizona, New Mexico and Colorado Rockies.

Unfamiliar With Weather and Local Factors

Weather – Fire Behavior Category

What kinds of questions would you ask of local experts?

Does the operational period plan or Incident Action Plan (IAP) give you adequate weather information? What kinds of weather forecasts are available? What other weather or local information do you look for in the plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. Examples include web-based Weather Activity Planner, Point Forecast Matrix, National Oceanic and Atmospheric Administration (NOAA) Internet Briefing.

To reduce risks:

- Base all actions on current and expected fire behavior.
- Establish escape routes and safety zones.
- Post lookouts.
- Discuss a fire where you relied on information from the local unit. For example, where your fire knowledge and experience were very different from how they did things—such as in the southeastern United States or Alaska.
- Recognize and report visual indicators (clouds, weather observed, cold front passage, inversion breaking).
