## Northwest Area (PL 3)

| New fires: | 17 |
| :--- | :---: |
| New large incidents: | 1 |
| Uncontained large fires: | 8 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 3 |

Vantage Highway, Southeast Region, Washington DNR. IMT 2 (NW Team 12). IMT is also managing the Cow Canyon Fire. Five miles west of Vantage, WA. Grass and brush. Moderate fire behavior with backing, flanking and creeping. Structures and energy infrastructure threatened. Area closures in effect.

Cow Canyon, Southeast Region, Washington DNR. Eleven miles north of Naches, WA. Timber and brush. Active fire behavior with short crown runs, group torching and short-range spotting. Structures threatened. Evacuations, area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Windigo, Umpqua NF, USFS. IMT 2 (NW Team 6). IMT is also managing the Potter fire. Twenty miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Moderate fire behavior with winddriven runs, torching and spotting. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Potter, Willamette NF, USFS. Forty-six miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Moderate fire behavior with wind-driven runs, torching and spotting. Area, road and trail closures in effect.

Cedar Creek, Willamette NF, USFS. IMT 1 (PNW Team 2). Fifteen miles east of Oakridge, OR. Timber. Active fire behavior with group torching, spotting and flanking. Structures threatened. Area, road and trail closures in effect.

Miller Road, The Dalles Unit, Oregon DOF. IMT 2 (NW Team 8). Eight miles west of Maupin, OR. Short grass, brush and timber. Moderate fire behavior with backing, creeping and smoldering. Numerous structures and energy infrastructure threatened. Evacuations have been lifted. Reduction in acreage due to more accurate mapping.

Williams Lake, Northeast Region, Washington DNR. Twelve miles south of Cheney, WA. Timber and tall grass. Active fire behavior with long-range spotting, wind-driven runs and flanking. Numerous residences threatened. Evacuations and road closures in effect.

Beech Creek, Malheur NF, USFS. Nine miles south of Long Creek, OR. Timber and grass. Moderate fire behavior with creeping, backing and isolated torching. Structures threatened. Reduction in acreage due to more accurate mapping.

Griffin, Burns District, BLM. Thirty-six miles northeast of Burns, OR. Brush, tall grass and timber. Active fire behavior. Precipitation occurred over the fire area yesterday.

*1 Hectare = 2.47 Acres

Predictive Services Discussion: A much drier airmass will move into northern California, Inland Northwest, northwest Great Basin, and Northern Rockies west of the Divide, with afternoon relative humidity of $5-20 \%$ and poor recovery of $20-40 \%$ for mid-slopes and ridges. Portions of southeast Oregon into southwest Idaho may have dry and breezy conditions as well. Isolated to scattered mixed wet and dry thunderstorms are likely to be ongoing across portions of central and eastern Idaho into southwest and central Montana in the morning, with scattered to widespread showers in eastern Montana throughout the day. Isolated mixed wet and dry thunderstorms are possible across portions of northern California, southern Oregon, and northwest Nevada. Scattered monsoonal thunderstorms will develop across much of the Southwest, eastern Nevada, southeast Idaho, Utah, Colorado, and Wyoming.

Hot, dry, unstable, and breezy conditions are likely across north Texas into the central Plains, with the most critical conditions across north Texas into southwest Oklahoma. A brief surge of Gulf of Mexico moisture is expected for central and south Texas, with minimum relative humidity near or above $30 \%$, but increased stability will limit chances for thunderstorms except near the Gulf Coast. Showers and thunderstorms are expected across the portions of the northern Plains into the western Great Lakes ahead of a cold front while scattered showers and thunderstorms develop along the Gulf Coast.

## http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you, or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards (falling snags or rolling materials, etc.)? Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review these guidelines.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fireline for uninterrupted rest.
- To reduce risks:
- Keep lookouts posted and rotate them.
- Communicate crew conditions and status to supervisor or chain-of-command contact.

Discuss ways $t$ to rest on the fireline and suggestions for methods to alternate shifts for more effective firefighting.
