

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 7, 2022 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Initial attack activity:	Light (78 fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires: **	36
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	9
***Complex IMTs committed:	2

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 61 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Uncontained large fires:	10
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Windigo, Umpqua NF, USFS. IMT 2 (NW Team 6). IMT is also managing the Potter fire. Twenty miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Moderate fire behavior with wind-driven runs, torching and spotting. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Potter, Willamette NF, USFS. Forty-six miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Moderate fire behavior with wind-driven runs, torching and spotting. Area, road and trail closures in effect.

Vantage Highway, Southeast Region, Washington DNR. IMT 2 (NW Team 12). IMT is also managing the Cow Canyon fire. Five miles west of Vantage, WA. Grass and brush. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area closures in effect.

Cow Canyon, Southeast Region, Washington DNR. Eleven miles north of Naches, WA. Short grass, timber and brush. Active fire behavior with flanking, backing and torching. Structures threatened. Evacuations, area, road and trail closures in effect

Cedar Creek, Willamette NF, USFS. IMT 1 (PNW Team 2). Fifteen miles east of Oakridge, OR. Timber. Active fire behavior with short crown runs, torching and short-range spotting. Structures threatened. Area, road and trail closures in effect.

Miller Road, The Dalles Unit, Oregon DOF. IMT 2 (NW Team 8). Eight miles west of Maupin, OR. Short grass, brush and timber. Minimal fire behavior with backing, creeping and smoldering. Numerous structures and energy infrastructure threatened. Reduction in acreage due to more accurate mapping.

Williams Lake, Northeast Region, Washington DNR. Twelve miles south of Cheney, WA. Timber and tall grass. Moderate fire behavior with creeping, smoldering and backing. Numerous residences threatened. Evacuations and road closures in effect.

Beech Creek, Malheur NF, USFS. Nine miles south of Long Creek, OR. Timber and grass. Moderate fire behavior with creeping, backing and isolated torching. Structures threatened.

Griffin, Burns District, BLM. Thirty-six miles northeast of Burns, OR. Brush, tall grass and timber. Active fire behavior.

* **Riparia**, Washington State Fire Marshall's Office. Ten miles west of Pomeroy, WA. Tall grass and brush. Moderate fire behavior. Structures threatened.

Predictive Services Discussion: A dry airmass will remain over the Inland Northwest today and spread into much of Idaho, western Montana, and northern California with relative humidity of 7-20% in the afternoon with poor overnight recovery of 20-40% for mid-slopes and ridges. Portions of northern California will have breezy conditions as well due to south winds gusting to 30 mph. Isolated mixed wet and dry thunderstorms are forecast across far northeast California into south-central Oregon with new fire starts possible. Scattered monsoonal thunderstorms will develop across much of the Southwest into the Colorado Rockies, but Nevada and Utah will be drier.

South winds of 10-20 mph will continue today across Texas and Oklahoma, but relative humidity will be higher at 25-40% due to increased low-level moisture from the Gulf of Mexico. Showers and thunderstorms are expected portions of the northern and central Plains into Midwest and Great Lakes ahead of a cold front. Isolated thunderstorms will develop from the southern Appalachians to the central Gulf Coast as well, but hot and dry conditions will develop this afternoon across the Northeast. Cool and moist conditions will continue across Alaska with another storm moving into western Alaska.

Terrain and Fuels Make Escape to Safety Zones Difficult

Operational Engagement Category

When fighting wildland fires, it is often easy to get committed to areas that put you in Watch Out Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Retreat times should be based on the slowest member of the crew.
 - Does the crew's condition allow for fast travel?
 - Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked?
 - Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be a lookout.
- To reduce the risks, consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
