${ }^{* * *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 49 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

## Northwest Area (PL 3)

New fires: 15
New large incidents: 1
Uncontained large fires: 7
Type 1 IMTs committed: 1
Type 2 IMTs committed: 2
Windigo, Umpqua NF, USFS. IMT 2 (NW Team 6). IMT 2 (NW Team 10) mobilizing. IMT is also managing the Potter and Big Swamp fires. Twenty miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Minimal fire behavior with creeping, single tree torching and smoldering. Area, road and trail closures in effect.

Potter, Willamette NF, USFS. Forty-six miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Active fire behavior with wind-driven runs, torching and spotting. Area, road and trail closures in effect.

Big Swamp, Willamette NF, USFS. Thirty-seven miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Moderate fire behavior with flanking, isolated torching and short-range spotting. Area, road and trail closures in effect.

Cedar Creek, Willamette NF, USFS. IMT 1 (PNW Team 2). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Active fire behavior with backing, single tree torching and short-range spotting. Structures threatened. Area, road and trail closures in effect.

Mohr Canyon, Spokane District, BLM. Started on private land eight miles southeast of Waterville, WA. Tall grass and brush. No new information.

Canyon Road, Washington State Fire Marshal's Office. Started on private land five miles south of Grandview, WA. Tall grass and brush. No new information.

Cow Canyon, Southeast Region, Washington DNR. Eleven miles north of Naches, WA. Short grass, timber and brush. No new information. Last report unless new information is received.

* White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Extreme fire behavior with short-range spotting, group torching and single tree torching. Numerous structures threatened. Evacuations in effect. Last narrative report unless significant activity occurs.

*1 Hectare = 2.47 Acres
Predictive Services Discussion: Low relative humidity $5-20 \%$ will spread across much of the Inland Northwest, northwest Great Basin, northern Rockies, and northern and central California, with occasionally breezy winds along the Cascade Gaps, Sierra Front, and in portions of the northern Rockies. Dry and breezy conditions are likely again on portions of the southern and central High Plains, with widespread temperatures in the upper 90s to low 100s. Isolated to scattered mixed wet and dry thunderstorms are likely across southeast Idaho into southwest and south-central Montana, and monsoon thunderstorms are expected across southeast California and the Southwest through the central and eastern Great Basin, Wyoming, and Colorado. Severe thunderstorms are possible from western South Dakota and eastern Wyoming into northeast Colorado and northwest Kansas. Thunderstorms remain likely across south Texas, along the Gulf Coast, and in much of Florida, with showers and thunderstorms in the Upper Ohio Valley into the central Appalachians.

Wildland Urban Interface Structure Protection
Operational Engagement Category

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

## Factors that may make an attempt to save a structure too dangerous include:

- The fire is making a sustained run and there is little or no clearance between the structure and the fuel.
- The fire behavior is extreme; spot fires are numerous and the spread is outpacing containment.
- Water supply will not last as long as the threat of the fire.
- The fire intensity dictates that you leave the fire area immediately.
- The structure is constructed of wood and has a wood shake roof.
- The roof of the structure is more than one-quarter involved.
- There is fire inside of the structure, or windows are broken and there is no way to quickly repair them.
- You cannot safely remain at the structure because your escape route could become unusable.

## When implementing a plan to protect structures, consider the following:

- Do not enter a burning structure unless you are trained, equipped, and authorized. Firefighter safety and survival is the number one priority.
- Always stay mobile and wear all personal protective equipment (PPE).
- Back in equipment to allow for a quick escape.
- Coil a short, charged line with a fog nozzle on your engine for safety and quick knockdown capability.
- Don't make long hose lays.
- Reserve at least 100 gallons of water in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave the inside and outside lights on, regardless of the time of day. Close the garage door.
- Place the owners' ladder at a corner of the home on the side with the least fire threat.
- Coil and charge garden hoses.
- Check and mark hazardous materials (e.g., Liquefied Propane Gas [LPG] tanks, pesticides, and paint storage.
