| Type 2 IMTs committed: | 7 |

Double Creek, Wallowa-Whitman NF, USFS. IMT 1 (PNW Team 2). IMT is also managing the Sturgill, Nebo, and Goat Mountain Two fires. Ten miles southeast of Imnaha, OR. Timber and short grass. Active fire behavior with uphill runs, group torching and flanking. Structures threatened. Evacuations, area, road and trail closures in effect.

Sturgill, Wallowa-Whitman NF, USFS. Fifteen miles southwest of Enterprise, OR. Timber and closed timber litter. Active fire behavior with group torching, flanking and backing. Structures threatened. Evacuations, area and trail closures in effect.

Nebo, Wallowa-Whitman NF, USFS. Twenty-one miles southeast of Enterprise, OR. Timber. Active fire behavior with group torching, flanking and backing. Area, road and trail closures in effect.

Goat Mountain Two, Wallowa-Whitman NF, USFS. Nine miles south of Lostine, OR. Timber. Moderate fire behavior with backing.

Boulder Mountain, Northeast Region, DNR. IMT 2 (GB Team 7). Started on private land nine miles northwest of Cusick, WA. Timber. Active fire behavior with spotting, group torching and single tree torching. Structures threatened. Evacuations, area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Rum Creek, Medford District, BLM. IMT 1 (ODF Team 1). Transfer of command from IMT 2 (NW Team 13) to IMT 2 (NR Team 6) will occur today. Twelve miles northwest of Hugo, OR. Timber and closed timber litter. Active fire behavior with backing, flanking and group torching. Numerous structures threatened. Several communities threatened. Evacuations, area, road and trail closures in effect.

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 6). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Moderate fire behavior with flanking, backing and torching. Structures threatened. Area, road and trail closures in effect.

Crockets Knob, Malheur NF, USFS. IMT 2 (NW Team 12). Nineteen miles north of Prairie City, OR. Brush, closed timber litter and timber. Active fire behavior with flanking, backing and torching. Structures threatened. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Transfer of command from IMT 2 (NW Team 8) back to the local unit will occur tomorrow. IMT is also managing the Irving Peak fire. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with flanking, backing and torching. Numerous structures threatened. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with flanking, backing and isolated torching. Structures threatened. Area, road and trail closures in effect.

Potter, Willamette NF, USFS. IMT 2 (NW Team 9). Forty-six miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Minimal fire behavior with backing, creeping and isolated torching. Area, road and trail closures in effect.

* Seven Bays, Northeast Region, DNR. Fifteen miles northwest of Davenport, WA. Timber and hardwood litter. Active fire behavior with single tree torching, short-range spotting and uphill runs. Structures threatened.
Evacuations, road and area closures in effect.
* Jones Creek, Wallowa-Whitman NF, USFS. Seventeen miles northeast of Imnaha, OR. Short grass, timber and brush. Moderate fire behavior with running, creeping and spotting. Last narrative report unless significant activity occurs.

| Ten Year Average Fires (2012 - 2021 as of today) | 41,731 |
| :--- | :---: |
| Ten Year Average Acres (2012 - 2021 as of today) | $5,638,437$ |

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.
***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

Predictive Services Discussion: Very hot, dry, and unstable conditions will be prevalent across much of the West peaking along thermal trough(s) in California into the Northwest and Great Basin. Widespread temperatures over $100^{\circ} \mathrm{F}$ are expected, including much of the Central Valley and surrounding foothills above $110^{\circ} \mathrm{F}$. Minimum relative humidity will be $3-15 \%$ across much of the West and breezy winds are likely to develop in portions of northeast California into southern and central Oregon and in portions of Wyoming. Near record Hot, Dry, Windy Index values are expected across the northern half of California and much of southern and central Oregon as well. Existing and any emerging new fires in these areas will be very active, with increased activity expected on most if not all existing large fires. Isolated mixed wet and dry thunderstorms are possible in the southern and central Sierra into western Nevada and from southwest Colorado into portions of Arizona and southern California over the higher terrain. Scattered thunderstorms and showers are likely from the Gulf Coast through much of the Southeast Ohio Valley and Mid-Atlantic into the Northeast. Heavy rain is likely from the DelMarVa through New Jersey and Connecticut.

## Frequent Spot Fires

 Across the LineWeather - Fire Behavior Category

This watch-out situation clearly indicates how much potential a fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting?
- List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.).
- What is your Probability of Ignition (PIG)? Is it increasing or decreasing?
- Do you have a plan for long-range spotting? In what fuel type and under what conditions is it likely? What planning would account for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place, or order, to handle spot fires?
- If fire behavior increases, is your position still defensible?
- Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case access to one is cut off?
- Describe how you might utilize multiple safety zones.
- Do the primary lookouts have a good view of the situation?
- Discuss who might be acting as a lookout (crew member, air resources, supervisors, etc.) and how you will get accurate information from that person. Are you relying on an air attack that is busy with airtankers?
- Where are you in the burning period? Talk about how your tactics for finding spot fires early in the day to later into the evening may vary. Review PIG and what it can tell you about spotting potential.
- To reduce the risk, are you ready to retreat?
- Keep your guard up even if spotting has not occurred for a few hours. Review incidents where you have had frequent spot fires and share what you have learned about controlling them.
