# National Interagency Coordination Center <br> Incident Management Situation Report <br> Wednesday, September 7, 2022 - 0730 MDT <br> National Preparedness Level 4 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: **
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
***Complex IMTs committed:

Light (108 fires)
652200615
${ }^{* * *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 56 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

## Northwest Area (PL 4)

| New fires: | 4 |
| :--- | :--- |
| New large incidents: | 0 |
| Uncontained large fires: | 9 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 6 |

Double Creek, Wallowa-Whitman NF, USFS. IMT 1 (PNW Team 2). IMT is also managing the Sturgill, Nebo, and Goat Mountain Two fires. Ten miles southeast of Imnaha, OR. Timber and short grass. Extreme fire behavior with short crown runs, wind driven runs and long-range spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Sturgill, Wallowa-Whitman NF, USFS. Fifteen miles southwest of Enterprise, OR. Timber and closed timber litter. Extreme fire behavior with short crown runs, uphill runs and spotting. Structures threatened. Evacuations, area and trail closures in effect.

Nebo, Wallowa-Whitman NF, USFS. Twenty-one miles southeast of Enterprise, OR. Timber. Active fire behavior with uphill runs, group torching and flanking. Area, road and trail closures in effect.

Goat Mountain Two, Wallowa-Whitman NF, USFS. Nine miles south of Lostine, OR. Timber. Moderate fire behavior with backing.

Boulder Mountain, Northeast Region, DNR. IMT 2 (GB Team 7). Started on private land nine miles northwest of Cusick, WA. Timber. Moderate fire behavior with single tree torching and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Rum Creek, Medford District, BLM. IMT 1 (ODF Team 1) and IMT 2 (NR Team 6). Twelve miles northwest of Hugo, OR. Timber and closed timber litter. Active fire behavior with backing, flanking and group torching. Numerous structures threatened. Several communities threatened. Evacuations, area, road and trail closures in effect.

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 6). IMT 1 (AK Team 1) mobilizing. Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Active fire behavior with flanking, group torching and spotting. Structures threatened. Area, road and trail closures in effect.

Crockets Knob, Malheur NF, USFS. IMT 2 (NW Team 12). Nineteen miles north of Prairie City, OR. Brush, closed timber litter and timber. Active fire behavior with flanking, backing and torching. Structures threatened. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Transfer of command from IMT 2 (NW Team 8) back to the local unit will occur today. IMT is also managing the Irving Peak fire. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with flanking, backing and torching. Numerous structures threatened. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with flanking, backing and isolated torching. Structures threatened. Area, road and trail closures in effect.

Potter, Willamette NF, USFS. IMT 2 (NW Team 9). Forty-six miles southwest of La Pine, OR. Closed timber litter, timber and medium slash. Minimal fire behavior with backing and creeping. Area, road and trail closures in effect.

Seven Bays, Northeast Region, DNR. Fifteen miles northwest of Davenport, WA. Timber and hardwood litter. Moderate fire behavior with backing, flanking and creeping. Structures threatened. Road and area closures in effect.

Thor, Colville NF, USFS. Previously reported incident. Six miles southeast of Metaline Falls, WA. Timber and closed timber litter. Active fire behavior with flanking, backing and isolated torching. Road closures in effect. Last narrative report unless significant activity occurs.

## Northern California Area (PL 3)

New fires:
New large incidents:
Uncontained large fires:
Type 1 IMTs committed:
Type 2 IMTs committed:

Mountain, Siskiyou Unit, Cal Fire. IMT 1 (Cal Fire Team 5). IMT is also managing the Mill fire. Thirteen miles southeast of Etna, CA. Short grass, brush and timber. Moderate fire behavior with flanking and backing.
Communities of Gazelle, Scott Valley and numerous structures threatened. Evacuations and road closures in effect.

Mill, Siskiyou Unit, Cal Fire. One mile northeast of Weed, CA. Short grass, brush and timber. Minimal fire behavior with smoldering and creeping. Several communities, numerous structures and infrastructure threatened. Evacuations and road closures in effect. Reduction in acreage due to more accurate mapping.

2022 SRF Lightning Complex (2 fires), Six Rivers NF, USFS. IMT 2 (CA Team 15). One mile northeast of Willow Creek, CA. Timber and light slash. Moderate fire behavior with creeping, backing and flanking. Several communities, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

* Mosquito, Tahoe NF, USFS. Twenty miles south of Emigrant Gap, CA. Timber, brush and hardwood litter. Active fire behavior with uphill runs, wind-driven runs and short-range spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Predictive Services Discussion: Very hot, dry, and unstable conditions will be prevalent across much of the West again peaking along thermal trough(s) in California into the Northwest, Great Basin, and northern Rockies. Widespread temperatures over $100^{\circ} \mathrm{F}$ are expected, including much of the Central Valley and surrounding foothills near $110^{\circ} \mathrm{F}$, and minimum relative humidity will be $3-15 \%$ across much of the West again. West-southwest winds will also strengthen, with gusts of $25-50 \mathrm{mph}$, across the Inland Northwest, far northern Nevada, southern and central Idaho, and much of Montana leading to elevated to critical fire weather conditions and high-risk significant fire potential. A weak Pacific cold front will move into the Northwest, northern Rockies, northern Great Basin, and northern California late in the day and overnight.

Isolated to scattered mostly dry thunderstorms are expected in the Sierra and from northwest California through portions of Oregon, Nevada, Idaho, and central Montana. Severe outflow winds will accompany some of these storms. Conditions conducive to pyrocumulonimbus development on very active large wildfires are also likely across the Sierra, northeast California, eastern Oregon, southern and central Idaho, and western and central Montana. Isolated mixed wet and dry thunderstorms are also possible across the greater Four Corners area. Scattered showers and thunderstorms remain likely along the Gulf Coast and in much of the Southeast, central Appalachians, and into the Mid-Atlantic.

## Firefighter Nutrition

Firefighter Health \& First Aid Category

Nutrition is a critical part of the health and safety of wildland fire suppression personnel. This is the fuel for the body to perform the work and maintain cognitive abilities. Wildland firefighters on the fireline need 4,000 to 6,000 calories a day to avoid an energy deficit. Consider the following key points when choosing your meal:

- There are three major energy sources in food: carbohydrates, protein, and fats.
- Carbohydrates (also called sugar) offer an immediate source of energy for your body. They provide the fuel for your muscles and organs, such as your brain.
- Proteins are the basic building blocks of the human body. They are made up of amino acids that help build muscles, blood, skin, hair, nails, and internal organs.
- Fat is an essential nutrient that provides energy, energy storage, insulation, and contour to the body.
- National Technology and Development Program (NTDP) recommends eating 150 to 200 kcals every two hours during the work shift to maintain blood glucose and energy levels.

## Carbohydrates:

- Studies on athletes have shown that carbohydrates are the most critical energy source for performance and health.
- Carbohydrates are your body's first choice for fuel. If given a choice of several types of foods simultaneously, your body will use the energy from carbohydrates first.
- If you do not eat enough carbohydrates, the following can occur:
- Fatigue.
- Muscle cramps.
- Poor mental function.
- Fire camp lunches are designed to allow firefighters small amounts of food (primarily carbohydrates) that can be easily eaten throughout the work shift.
- 

## Discussion Points:

How are you eating your fire lunch? Is it all at once or in small amounts throughout the day? Think of longduration events (ultra runs, triathlons). Do athletes stop for a big meal or eat small amounts constantly throughout the race?
