${ }^{* * *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 82 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

Cedar Creek, Willamette NF, USFS. IMT 1 (AK Team 1) and IMT 1 (PNW Team 3). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Double Creek, Wallowa-Whitman NF, USFS. IMT 1 (SA Blue Team). IMT is also managing the Sturgill, Nebo, and Goat Mountain Two fires. Ten miles southeast of Imnaha, OR. Timber and short grass. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Sturgill, Wallowa-Whitman NF, USFS. Fifteen miles southwest of Enterprise, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Nebo, Wallowa-Whitman NF, USFS. Twenty-one miles southeast of Enterprise, OR. Timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Goat Mountain Two, Wallowa-Whitman NF, USFS. Nine miles south of Lostine, OR. Timber. Minimal fire behavior with creeping and smoldering.

Goat Rocks, Gifford Pinchot NF, USFS. IMT 2 (NW Team 10). Eight miles east of Packwood, WA. Timber. Minimal fire behavior with flanking, backing and smoldering. Numerous residences threatened. Area, road and trail closures in effect.

Bolt Creek, Northwest Region, DNR. IMT 2 (NW Team 8). Two miles north of Skykomish, WA. Timber, closed timber litter and hardwood litter. Minimal fire behavior with flanking, backing and creeping. Numerous structures threatened. Evacuations have been lifted. Area, road and trail closures in effect.

Boulder Mountain, Northeast Region, DNR. Transfer of command from IMT 2 (GB Team 7) to IMT 2 (NW Team 13) will occur today. Nine miles northwest of Cusick, WA. Timber and medium slash. Minimal fire behavior with creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

Rum Creek, Medford District, BLM. IMT 2 (NR Team 6). Twelve miles northwest of Hugo, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Chilliwack Complex (3 fires), North Cascades NP, NPS. NIMO (Team 2). IMT is also managing the NW Pasayten Complex. Thirty miles east of Maple Falls, WA. Timber. Minimal fire behavior. Structures threatened. Trail closures in effect.

NW Pasayten Complex (5 fires), Okanogan-Wenatchee NF, USFS. Twenty miles northeast of Diablo, WA. Timber. Minimal fire behavior. Structures threatened. Trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Minimal fire behavior with backing and creeping. Numerous structures threatened. Area, road and trail closures in effect.

Minnow Ridge, Okanogan-Wenatchee NF, USFS. Twenty-five miles north of Leavenworth, WA. Timber. Moderate fire behavior with backing, creeping and flanking. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. No new information.

Crockets Knob, Malheur NF, USFS. Nineteen miles north of Prairie City, OR. Brush, closed timber litter and timber. No new information. Last report unless new information is received.

${ }^{* * *}$ Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov

Predictive Services Discussion: Wetting rain will fall over the central and northern California coast and spread inland to the western slopes of the Sierra. Heavy rain is expected in portions of the Coast Ranges and possibly in portions of the Sacramento Valley. Isolated thunderstorms are likely in portions of the Inland Northwest, Idaho, and Montana, with better chances and coverage near a stalled surface front. South-southwest sustained winds of $12-20$ mph with gusts of $25-40 \mathrm{mph}$ amid minimum relative humidity of $8-25 \%$ are expected in portions of the eastern Sierra across the southern half of the Great Basin into the Colorado Rockies, southern Wyoming, and northern Arizona. Dry and breezy conditions are likely to spread onto portions of the southern and central High Plains as well. Isolated thunderstorms are also possible from southeast Arizona and southern New Mexico into southwest Colorado. Thunderstorms will likely continue along portions of the Gulf Coast and over much of the Florida Peninsula, and strong to severe thunderstorms are likely in portions of the Midwest. Tropical Storm Fiona is forecast to strengthen into a hurricane before making landfall on Puerto Rico, with tropical storm to hurricane conditions across the entire island, including widespread heavy rain and flooding. Strong winds, rain, and coastal flooding will continue on portions of the western Alaska coast.

## Downhill Fireline Construction Checklist

Operational Engagement Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline:

- Crew supervisor(s) and fireline overhead must discuss assignments prior to committing personnel. Qualified, responsible overhead individuals such as a Task Force Leader (TFLD) or an Incident Commander Type 4 (ICT4) at minimum, will stay with resources until the job is completed.
- Decisions about downhill fireline construction will be made only after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- Lookouts, Communications, Escape Routes, and Safety Zones (LCES) will be coordinated for all personnel involved. This includes verifying:
- Crew supervisors are in direct contact with lookout(s) who can see the fire.
- Communication is established between crews.
- Rapid access to safety zones is ensured in case fire crosses below crews.
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crews building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Before carrying fire with you, ensure it can be done safely.
