

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 30, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (157 fires)
New large incidents:	12
Large fires contained:	9
Uncontained large fires: **	27
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 66 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	3
New large incidents:	2
Uncontained large fires:	8
Type 2 IMTs committed:	2

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 7) and IMT 2 (NW Team 9). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with creeping, isolated torching and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Double Creek, Wallowa-Whitman NF, USFS. Ten miles southeast of Imnaha, OR. Timber and grass. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Goat Rocks, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures threatened. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Area, road and trail closures in effect.

Minnow Ridge, Okanogan-Wenatchee NF, USFS. Twenty-five miles north of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Area, road and trail closures in effect.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber and light slash. Moderate fire behavior with creeping, smoldering and backing. Structures threatened. Area, road and trail closures in effect.

* **Vines Hill**, Vale District, BLM. Six miles east of Harper, OR. Brush and short grass. Extreme fire behavior with wind-driven runs, flanking and creeping. Structures and sage-grouse habitat threatened.

* **McAllister Creek**, North Cascades NP, NPS. Six miles southeast of Newhalem, WA. Timber. Active fire behavior with flanking, backing and group torching. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Ian will make landfall on the South Carolina coast as a tropical storm or category one hurricane. Tropical storm to hurricane force winds are expected along the South Carolina coast and possible stretching into portions of Georgia and North Carolina, with storm surge stretching from Georgia to North Carolina, including heights potentially up to seven feet in South Carolina. There is uncertainty on how far inland Ian will maintain tropical storm strength, but near tropical storm force winds are likely near its center into upland South Carolina and possibly western/central North Carolina and eastern Georgia. Regardless, heavy rainfall is expected across the Carolinas, eastern Georgia, and southern Virginia. Lingering relative humidity of 20-35% and breezy north-northeast winds should remain over western portions of the Ohio and Tennessee Valleys through the Lower Mississippi Valley and southeast Texas into central Texas.

South-southwest sustained winds of 10-20 mph gusting 20-35 mph amid minimum relative humidity of 10-20% are expected on portions of the southern and central High Plains, especially from the Texas Panhandle into southwest Kansas. Dry and breezy conditions are likely to spread farther east and north into Oklahoma, Kansas, and Nebraska as well. Showers and thunderstorms are expected over portions of northern Idaho and western into central Montana, with isolated to scattered thunderstorms likely stretching through the Colorado Rockies into Utah and onto portions of the northern High Plains. Isolated thunderstorms are also likely in far southern Arizona.

Hazard Tree – No Work Zones (NWZ) *Felling Safety Category*

Knowing the exact time a given hazard tree (or compromised section) will fail is extremely difficult, and is, in many cases, an unpredictable task. Given this fact, we need to manage firefighters' exposure to these hazards by creating a safe work area or No Work Zone (NWZ). The size and extent of the NWZ must be determined by onsite conditions, such as terrain, stand structure, and fire impacts on the tree and adjoining trees.

When an identified hazardous tree or trees cannot be felled, then perform an assessment of which areas have too high a risk and post a lookout to warn the personnel to stay clear of these areas while working in adjacent areas. If hazard still exists before leaving the area, flag the NWZ so that personnel entering the area will be able to recognize the hazard. Use the following failure zone illustrations as examples to help manage firefighter exposure to these identified hazards. Also, remember to include the possibility of the Domino Effect to surrounding trees.
