${ }^{* * *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 66 fires being managed under a strategy other than full suppression.
**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A cold front will slowly push south across the southern Plains and east through the Ozarks as it weakens, but another cold front will start moving south on the northern Plains and into the western Great Lakes. Low relative humidity of $15-30 \%$ will continue from the southern Great Lakes to the Gulf Coast and south Texas, but winds should remain relatively light. Warm and dry conditions will remain in California, the western and northern Great Basin, and Inland Northwest. Thunderstorms will continue over the Southwest into the Colorado Rockies, and scattered showers with isolated thunderstorms are likely across portions of the Midwest and western Great Lakes associated with the cold front and upper low passage. Lingering showers are also likely along portions of the MidAtlantic and New England coasts.

## Fight Fire Aggressively, Having Provided for Safety First Operational Engagement Category

Standard Firefighting Order \#10 must be considered at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Are we making progress? Are we beating our heads against a wall? Is there a better way to get this done?
- Give examples of when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Do we need to retreat and reevaluate?
- Talk about how you dealt with times when you realized you were not making progress on a fire.
- Are lookouts posted? When you post lookouts, who would you choose to be a lookout, and where should they be located?
- Are communications prompt with crews and other resources?
- Review the importance of effective communications on the fireline.
- Have escape routes and safety zones been established?
- Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment?
- Discuss how you evaluate the situation. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
- Post lookouts.
- Establish trigger points.
- Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
