**Predictive Services Discussion:** Dry conditions with low afternoon relative humidity of 15-30% is forecast from the central High Plains east into the southern Great Lakes, then south into Alabama and Mississippi. Locally breezy winds of 10-15 mph, west across portions of the Midwest and north across Alabama and Mississippi, will create areas of elevated conditions. Numerous showers and thunderstorms will continue over eastern Arizona and New Mexico, with scattered thunderstorms across the greater Four Corners area and into west Texas. Isolated afternoon thunderstorms are possible across portions of the eastern Sierra, southeast California, and southern Nevada as well. Above normal temperatures and low afternoon relative humidity will continue across the West with light winds. Cool, showery conditions are likely across northern New England while showers and thunderstorms are expected across the southern Florida peninsula.
