

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, October 18, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (52 fires)
New large incidents:	3
Large fires contained:	3
Uncontained large fires: **	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4
***Complex IMTs committed:	0

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 67 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northwest Area (PL 2)**

New fires:	7
New large incidents:	1
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Loch Katrine**, Mt. Baker-Snoqualmie NF, USFS. IMT 2 (NW Team 9). Thirteen miles northeast of Snoqualmie, WA. Closed timber litter, timber and medium slash. Active fire behavior with single tree torching, backing and creeping. Area, road and trail closures in effect.

**Nakia Creek**, Pacific Cascade Region, Washington DNR. IMT 1 (ODF Team 2). Started on private land nine miles northeast of Camas, WA. Timber, medium slash and brush. Extreme fire behavior with wind-driven runs. Numerous structures, communication and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Cedar Creek**, Willamette NF, USFS. IMT 2 (NW Team 12). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Moderate fire behavior with uphill runs, creeping and spotting. Numerous structures threatened. Area, road and trail closures in effect.

**Goat Rocks**, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect.

**Suiattle River**, Mt. Baker-Snoqualmie NF, USFS. Eleven miles northeast of Darrington, WA. Timber. Active fire behavior with single tree torching, flanking and creeping. Structures threatened. Road and trail closures in effect.

**White River**, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior. Numerous structures threatened. Area, road and trail closures in effect.

**Kalama**, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber. Minimal fire behavior with smoldering, creeping and backing. Structures threatened. Area, road and trail closures in effect.

\* **Sunset**, Gifford Pinchot NF, USFS. Eight miles east of Moulton, WA. Timber and medium slash. Moderate fire behavior with isolated torching, spotting and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

**Fishhawk Loop**, Astoria District, Oregon DOF. Twenty-four miles southeast of Astoria, OR. Medium slash, timber and brush. No new information.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov>

**Predictive Services Discussion:** Elevated fire weather conditions are possible if not likely in the Mid/Lower Mississippi, Lower Missouri, and Ohio Valleys, central Gulf Coast, eastern portions of the southern and central Plains, and east and central Texas as northerly sustained winds of 10-20 mph gusting 25-35 mph amid minimum relative humidity 10-30% develop. Widespread critically low relative humidity is expected from the southeast Atlantic Coast to central Texas. Temperatures will be below normal, with highs in the 40s to 60s across these areas. Above normal temperatures and minimum relative humidity of 8-25% will continue across much of the northwestern CONUS. Higher relative humidity is expected west of the Cascades due to weak onshore flow during the day, but offshore flow may develop overnight as a thermal trough extends along coastal Oregon and northern California into western Washington. Showers with isolated embedded thunderstorms will continue over the Great Lakes and New England, including snow in parts of the Great Lakes, most likely in the Upper Peninsula of Michigan. Thunderstorms and showers are likely in south Texas and Florida as well.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

The use of ATVs for wildland fire suppression and prescribed fire operations has increased dramatically over the last ten years. Note: Several agencies have required training for ATV operations (check your agency's requirements).

Most injuries associated with ATVs occur when:

- Driver loses control (When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control.),
- Vehicle rolls over,
- Driver or passenger is thrown off,
- Operator's loss of attention to what, where, and how an ATV is being operated, or
- There is a collision with a fixed object.

Identified contributing factors to ATV accidents include:

- Rider is inexperienced,
- Excessive speed combined with rough terrain can create enough pitch and bounce to cause the operator to lose control of the vehicle,
- Lack of helmet use,
- ATV is improperly loaded, or load weight exceeds vehicle operation capacity, or
- Operator carries a passenger that affects the operator's control and operation of the ATV.

Safety measures for ATV use include:

- Conduct pre-ride inspection which should include checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or driveshaft, and air filter. Clean out of weeds and other debris from around engine and other hot components and check the chassis for any defects or wear.
- Single riders only. Injuries frequently occur to passengers; therefore, riding double should not be permitted.
- Always wear PPE – helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle use (not firefighting) and should include safety visors/face shields, goggles, or safety glasses for eye protection.
- Use headlights to improve visibility by other vehicles.
- Maintain speeds acceptable for riding conditions, especially over uneven terrain.
- Avoid traversing slopes.
- Mounted or towed loads should not exceed the manufacturer's recommendation and should be properly mounted so that weight transfer does not affect the center of gravity of the machine – mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
- Do not drive on public roads. Collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads; check your state's laws.
